

Certification Scheme: Nationally Registered Emergency Medical Technician

Policy No.: 52.41

Revision: 01

Effective: April 15, 2020

Page 1 of 6

Intent

This policy specifies the certification scheme for the Nationally Registered Emergency Medical Technician (NREMT) certification, including scope of certification, job and task description, required competence, required abilities, prerequisites and applicable code of conduct.

Scope

This certification scheme applies only to the Nationally Registered Emergency Medical Technician (NREMT) certification.

Definitions

EMT – Emergency Medical Technician

Certification – National Registry verification that an individual possesses the knowledge, skills, and abilities (competencies) to do a job as defined by the requirements of the certification scheme.

Recertification - The renewal or maintenance of certification in which stated requirements are met.

Re-entry - A pathway in which the candidate's state EMS license or National Registry certification has expired.

Policy

Scope of Certification

This certification is aligned with the Emergency Medical Technician role as defined by the current National EMS Scope of Practice Model (NASEMSO, 2019) which states:

“An EMT is a health professional whose primary focus is to respond to, assess and triage emergent, urgent, and non-urgent requests for medical care, apply basic knowledge and skills necessary to provide patient care and medical transportation to/from an emergency or health care facility. Depending on a patient's needs and/or system resources, EMTs are sometimes the highest level of care a patient will receive during an ambulance transport. EMTs often are paired with higher levels of personnel as part of an ambulance crew or other responding group. With proper supervision, EMTs may serve as a patient care team member in a hospital or healthcare setting to the full extent of their education, certification, licensure, and credentialing. In a community setting, an EMT might visit patients at home and make observations that are reported to a higher-level authority to help manage a patient's care. When practicing in less populated areas, EMTs may have low call volume coupled with being the only care personnel

during prolonged transports. EMTs may provide minimal supervision of lower level personnel. EMTs can be the first to arrive on scene; they are expected to quickly assess patient conditions, provide stabilizing measures, and request additional resources, as needed” (p. 26).

Job and Task Description

This certification is aligned with the Emergency Medical Technician role as defined by the current National EMS Scope of Practice Model (NASEMSO, 2019). This document describes the EMT role as

- Function as part of a comprehensive EMS response, community, health, or public safety system with defined clinical protocols and medical oversight.
- Perform interventions with the basic equipment typically found on an ambulance to manage life threats, medical, and psychological needs.
- Are an important link within the continuum of the emergency care system from an out of hospital response through the delivery of patients to definitive care (p. 26).

The National Registry performs a Practice Analysis at least every five years in accordance with the *National Registry Practice Analysis Policy*. The latest National Registry Practice Analysis identifies the necessary knowledge, skills, and abilities for the profession.

Required Competence

The NREMT certification is designed to verify minimum entry level competency for EMTs.

Required Abilities

The National Registry does not assess the abilities required for EMTs but requires the verification of abilities by a process approved by the State EMS Office.

Prerequisites

Prerequisites to certification include:

1. Successful completion of a state-approved Emergency Medical Technician (EMT) course that meets or exceeds the National Emergency Medical Services Education Standards for the Emergency Medical Technician (NHTSA, 2009).
 - a. Candidates must have completed the course within the past two years and the course Program Director must verify successful course completion on the National Registry website.
 - b. If the initial Emergency Medical Technician (EMT) educational program was completed more than two years ago and the candidate is currently state licensed at the EMT level,

 <p>National Registry of Emergency Medical Technicians® THE NATION'S EMS CERTIFICATION™</p>	<h2>Certification Scheme: Nationally Registered Emergency Medical Technician</h2>		
Policy No.: 52.41	Revision: 01	Effective: April 15, 2020	Page 3 of 6

the candidate must document proof of education requirements. The following methods are acceptable:

- i. Successful completion of a state-approved EMT refresher course or 20 hours of continuing education that meets all requirements of the current National Component of the 2016 National Continued Competency Program (National Registry of EMTs, 2016) within the past two years.
 - c. If a candidate's EMT state license has lapsed, or an individual's National EMT Certification has lapsed, the candidate is considered to be re-entry and must document proof of 40 hours of continuing education that meets all requirements of the 2016 National Continued Competency Program (National Registry of EMTs, 2016) within the past two years.
2. Have a current AHA BLS for "Healthcare Provider" or equivalent credential.
 3. Successful completion of a State EMS Office approved assessment of psychomotor skills within the past 24 months.

Code of Conduct

All National Registry certificants are accountable to the *National Registry Code of Conduct* (see reference).

Criteria for Initial Certification

1. Documented completion of all prerequisites.
2. Successful completion of the National Registry EMT cognitive examination per the requirements of relevant policies.
3. Met the eligibility requirements of the *Terms of Certification* and *Criminal Conviction Policy*

Certification Period

1. The time period of certification for the NREMT certification is two years.
2. Initial expiration dates are determined by the date the candidate successfully completes the entire national certification process (cognitive and psychomotor exams). EMT candidates completing the national certification process between the January 1 and June 30 will receive an expiration date of March 31 two years in the future. Individuals successfully completing the national certification process between July 1 and December 31 will receive an expiration date of March 31 three years in the future.
3. Recertification expiration dates are two years from the expiration date of the prior period.

Criteria for Recertification

1. Met the eligibility requirements of the *Terms of Certification* and *Criminal Conviction Policy*.

Policy No.: 52.41	Revision: 01	Effective: April 15, 2020	Page 4 of 6

2. Recertification can be accomplished by either continuing education or examination.
 - a. Complete forty hours of approved continuing education after the initial date and before the expiration date of the certification. Continuing education must be accepted by the State EMS Office or accredited by CAPCE (National Registry of EMTs, 2019).
 - i. The objectives of the current National Component of the 2016 National Continued Competency Program (National Registry of EMTs, 2016) must be met, consisting of at least twenty hours of approved continuing education. No more than seven hours of the National Component can be distributive education (National Registry of EMTs, 2019).
 - ii. At least ten hours of state accepted or CAPCE accredited continuing education for the Local Component of the National Continued Competency Program, meeting any State or Local requirements. No more than seven hours of the Local Component can be distributive education (National Registry of EMTs, 2019).
 - iii. At least ten hours of continuing education for the Individual Component of the National Continued Competency Program (National Registry of EMTs, 2019).
 - b. Successful completion of the National Registry EMT cognitive examination one year before the current certification expiration. Only one attempt at the examination is allowed. If a passing score is not achieved, continuing education can be used if completed within the certification period (National Registry of EMTs, 2019).
3. Completion of the recertification application and paid appropriate fees.
4. Verification of continued competency of skills and abilities by the local Training Officer.
 - a. If verification cannot be provided, recertification is allowed as inactive. Verification of continued competency for skills and abilities by a local training officer is required to convert inactive status to active status (National Registry of EMTs, 2019).

Criteria for Suspending and Withdrawing Certification

The criteria for withdrawing and suspending certification are specified by the *Terms of Certification* and *Disciplinary Action* policies.

Criteria for Changing the Scope of Level of Certification

In the event of a significant change in the scope of the certification, the National Registry releases a *Transition Policy* to implement the change in scope, including the required assessments (see reference *Transition Policy*). Certificants may request to drop to a lower level certification. If they wish to regain the certification level, they will need to follow the appropriate prerequisites for certification (see reference *Request a Lower Certification Level* policy).

Rationale

The certification scheme is developed with an objective of providing assurance that a person who seeks or maintains national EMS certification meets specific requirements and demonstrated competency. Recognition of competence through the achievement of national certification leads to increased public confidence and protection of the public.

The certification practices of the National Registry are consistent with the ISO 17024:2012 standards and current National Commission for Certifying Agencies (NCCA) standards. The assessment and examination practices of the National Registry are consistent with current APA AERA NCME Standards for Educational and Psychological Testing and National Commission for Certifying Agencies (NCCA) standards.
