

## INTEGRATED OUT-OF-HOSPITAL SKILL STATION PROP LIST

---

The Examination Coordinator is responsible for obtaining and setting up the skill stations the day before the scheduled psychomotor examination if possible. If it is not possible to set-up all skills, the Examination Coordinator must at least verify the availability of all equipment that is considered to be the minimal essential equipment needed. To better prepare for the Integrated Out-of-Hospital scenario having these things available will decrease the time it takes to set up the skill station on the day of the examination.

- Table and chair(s)
